

UNITED PLASTIC MOLDERS, INC. CAPABILITY STATEMENT

COMPANY OVERVIEW

Founded in 1978 by Bill Hoge, United Plastic Molders remains one of Mississippi's oldest injection molders and is also a full-scale Tool & Die shop.

Due to high quality workmanship and nothing more than word of mouth advertising, UPM has grown and expanded to include six buildings with over 60,000 square feet of warehousing and work space.

Mr. Hoge has been a long-serving member on the Board of Directors for the Mississippi Manufacturers Association.

OUR TEAM

With 20-30 years of experience each, our staff are some of the industry's best and most qualified in their respected fields.

With our wealth of experience and the latest equipment, UPM has the unique ability to offer start to finish services for customers ranging from the largest corporations to inventive entrepreneurs with a great idea.

QUALITY COMMITMENT

Over the course of the last 40 plus years, United Plastic Molders has assembled a team of employees who are some of the industries best and most qualified in their field

WHAT WE OFFER

Injection Molding

Our team will work with you to ensure your product is built to the exact standards and colors required for your project

Mold Design & Building

Save valuable time and money in your mold building process using our own mold bases.

All you need is a new aluminum cavity core.

Mold Repair & Maintenance

We maintain all customer owned molds stored at our facility, as well as offering in-house inspection, maintenance, and repair of molds for customers throughout the US

Tool & Die Shop

Complete Tool & Die Shop with five CNC Mills ranging in size from our Super Mini with a 36"X12" table for smaller runs, to our VF8 with a 64"X36" table for the largest projects

Prototyping

We always appreciate the opportunity to work with folks who have nothing more than a hand drawn concept or just a good idea for a new product

UV Flatbed Printing

Print any high-quality, full color design or logo directly onto your products. UV light cures ink instantly, eliminating down time between runs and increasing daily production
